Introducing **NEW** DataXS-Mail for OpenText Content Server

DMC²

Discover, cleanse and migrate your legacy MS Outlook PST files content to OpenText Content Server...easily!

4 Simple Steps to PST file content migration

- Extract message file data from your PST file to a CSV spreadsheet format.
- Cleanse message file data and create a subset of messages for migration
- Extract messages objects from your PST to your Content Server load area
- Bulk load mail message files to Content server
